Twelve-Inch Plastic Seal Adjusts to Suit Application

Those responsible for deterring theft and/or tampering can take advantage of a redesigned plastic seal from the BROOKS Company that is now available with a 12" tail. Secur-Pul's loop can be adjusted to seal a wide range of applications including:

- Tote Boxes
- ATM cassettes
- Zippered Money Bags
- Fiber Drums
- In-Bond Shipments
- Lockout / Tagout
- Valves
- Mini-Bars/Liquor Kits
- Vending Machines
- Measuring Devices
- Pouches
- Scales
- Tank Trucks
- Hose Tubes

Previously only available with a 7" tail, the 12" Secur-Pul is made of polypropylene and features a patented, integral metal clip through which the .078" diameter tail is inserted and pulled. The new Secur-Pul version allows the user to tear away any excess tail for a neater appearance.

For security and tracking purposes, the 2-1/4" x 3/4" flag can be heat-stamped with a company logo along with seven consecutive numbers. The 12" Secur-Pul provides an average pull-apart strength of 35lbs to withstand unintentional rugged handling. It is available in a choice of eight colors and is supplied in a matted format with ten seals per mat.
